DETAILED ACTION

Response to Amendment

1. The amendment filed on December 6, 2004 is sufficient to overcome the Basu et al reference. The amendment changed Claim 2 into an independent claim. The amendment also amended Claims 1 and 3. The currently pending claims considered below are Claims 1-8 and 10-17.

Claim Rejections - 35 USC § 101

2. The amendment filed on December 6, 2004 amended Claims 1 and 3 so as to place them within the technological arts. Therefore, the previous rejection of these claims and their dependent claims in the Office Action of August 5, 2004 is hereby withdrawn.

Allowable Subject Matter

3. Claims 1-8 and 10-17 are allowed.

Examiner's Statement of Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Prior art was found which disclosed a variety of economic models for predicting changes in an economy using a plurality of agents with decision rules by receiving input values for each agent, outputting changes to the value based on the decision rules, and

repeating the steps until a terminal condition is met (e.g. predetermined error rate is achieved) at which time a representation of the final economic prediction is output. (Goonatilake et al, "Intelligent Systems for Finance and Business", chapters 14-16, pages 251-311; Pindyck et al, "Microeconomics", pages 649-657; Manos, US 5,884,283, col 10, line 12 – col 14, line 55; Sandretto, US 5,812,988, col 8, line 52 – col 12, line 55; Sakashita et al, JP 08314892, Abstract; Dethloff et al, DE 3830326, Abstract. However, prior art was not located which disclosed in detail the specific steps as in independent claims 1, 2, 10, and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Krist et al (5,486,995) discloses a method and apparatus for an optimizing modeling system using "the current economic conditions".

b. Tull, Jr. et al (5,946,667) discloses a method and apparatus for using modeling systems to forecast economic conditions in the stock market.

c. Harhen (5,406,477) discloses a method and apparatus for generating projections of economic changes.

d. Miller et al (5,652,717) discloses a method and apparatus for collecting and analyzing economic data for a geographical area to simulate the predicted outcome of various actions.

e. Keane (5,737,581) discloses a method and apparatus for a simulator which uses financial and macroeconomic models to enhance realism.

f. Orr et al (5,818,737) discloses a method and apparatus for predicting economic development of a community based on simulated economic changes.
